

Steering board health inequalities assessment report

All outline and full proposals that want support from us must include a health inequalities assessment report. The steering board will use this report to decide whether your proposal ‘fits’ with our objective: to make sure that everything we do has the potential to reduce health inequalities and their causes.

In the form below, we ask you to briefly outline your response to each section of the toolkit.

In particular, we would like you to specify any change you have made to your planned activity as a result of your assessment, or explain why you feel changes are not necessary.

You should use the toolkit with the members of the public involved in your activity. Please briefly outline how you have involved them or explain why you did not involve them at this stage.

1. Name of your project

2. Theme of your project

3. Who was involved in the assessment (include relevant members of the public)? If you did not involve the public, please say why not.

APPENDIX 1

4. Please summarize the results of your assessment under the section headings. For each stage, highlight the changes to your activity as a result of the assessment. If you did not make any changes, please give your reasons why.

What are the health inequalities that influenced or created this problem?

How will your proposed work tackle the socio-economic causes of the inequalities in health you identified in section 1?

APPENDIX 1

How will you make sure that your evaluation and monitoring shows the effect of your activity on health inequalities and their causes?

Empty response area for the first question.

What wider effect might your activity have on health inequalities and their causes and how can this be delivered?

Empty response area for the second question.
